## 🧠 SKILLS

### Advanced Web Technologies

Basic working knowledge of React, Node.js, Express.js, and MongoDB for developing interactive, full-stack web applications.

### Web Technologies

Good knowledge of creating responsive and visually appealing websites using HTML, CSS, JavaScript, and Bootstrap.

### Wordpress

Skilled in building responsive and user-friendly WordPress interfaces, handling basic theme customization, UI development, and developing simple plugins to extend functionality.

## 🎓 EDUCATION

### B.E. Mechanical

Shivaji University  
2016 | Kolhapur, India

### HSC

State Board Of Maharashtra  
2012 | Kolhapur, India

### SSC

State Board Of Maharashtra  
2010 | Kolhapur, India

## 🌐 LANGUAGES

English | Hindi | Marathi

## 👤 PROFILE

Frontend Developer skilled in crafting responsive websites with a focus on clean code and user-friendly design. Committed to continuous learning and delivering innovative web solutions.

## 📁 PROFESSIONAL EXPERIENCE

### Mechanical Stream

2017 – 2022 | Kolhapur, India

I work in the mechanical engineering field as a design engineer, specializing in creating 2D and 3D models using AutoCAD and SolidWorks. My focus is on developing precise and efficient mechanical designs for various industrial applications.

### IP WEBSOFT

Team Lead

Apr 2022 – present | Kolhapur, India

As a Team Lead at IP Websoft, I guide and mentor a team of frontend developers in delivering high-quality web applications using HTML, CSS, JavaScript, and WordPress. I collaborate with project managers, clients, and cross-functional teams to plan, prioritize, and execute tasks, ensuring timely delivery and adherence to quality standards while focusing on a seamless, user-centric experience.

## 📁 PROJECTS

### Sigmoid

Roles & Responsibilities :

- **Website Development:** Built and deployed a fully functional website using **WordPress** as the CMS platform.
- **Theme Customization with LiveCanvas:** Utilized the **LiveCanvas** theme, which is based on the **Bootstrap framework**, allowing for clean and responsive design structures.
- **HTML/CSS/JavaScript Customization:** Customized and extended the theme by directly editing **HTML**, **CSS**, and **JavaScript** to meet specific design and functional requirements.
- **Responsive Design Implementation:** Ensured the website is mobile-friendly and responsive by leveraging **Bootstrap's grid system** and utility classes.

### Climez

Roles & Responsibilities :

- **Website Development from Scratch:** Designed and developed a responsive website using **pure HTML5**, **CSS3**, and the **Bootstrap framework** without the use of any CMS.
- **Responsive Layout Implementation:** Leveraged **Bootstrap's grid system** and components to build a fully responsive layout compatible with all screen sizes and devices.
- **Custom Styling & Design:** Applied custom **CSS** to style components and layout elements according to the project's branding and design requirements.

- **Interactive Features with Bootstrap Components:** Integrated **Bootstrap components** like carousels, modals, navbars, and accordions to enhance user experience and interactivity.

### Entity fitness studio

Roles & Responsibilities :

- **Website Creation Using WordPress:** Developed a professional, responsive website using **WordPress** as the primary content management system.
- **Theme Implementation with Astra:** Installed and customized the **Astra theme**, known for its lightweight and performance-optimized structure.
- **Page Building with Astra Page Builder:** Used **Astra-compatible page builder** (Spectra) to design and structure pages with a drag-and-drop interface, enabling fast and flexible layout creation.
- **Design Customization:** Tailored website design by adjusting **global theme settings**, layout options, typography, colors, and header/footer styles to match branding guidelines.
- **User Experience & Mobile Optimization:** Ensured the website is fully **responsive and mobile-friendly**, with smooth navigation and accessibility across all devices.

### React - To-Do application

Developed a dynamic To-Do application using React, featuring a responsive user interface and efficient state management with hooks. Implemented functionality for adding, deleting, and marking tasks as complete.

### React - Student Record Management

Developed a full-stack Student Record Management application using React for the frontend and Node.js, Express, and MongoDB for the backend. Designed and implemented complete CRUD operations with a clean UI and real-time updates.

### DECLARATION

I hereby declare that the information provided above is true to the best of my knowledge and belief.
